Spaces for a new work landscape

The workplace has changed and continue to evolve. Offices and commercial spaces are taking fresh approach to the typical work environment. It is less about dividing space and more about open free flowing interiors that are playful and collaborative, with a focus on expressing a sense of character and individuality.

Pod evolution has come a long way. Originally introduced to enhance and support breakout space, pods have become rooms in their own right, creating an area where creativity and innovation takes place. Having long been used as a place to hold meetings that require a level

of privacy, pods are now being used in a very different way, helping us in the way we choose to work.

We are witnessing a new wave of modern pod that breaks away from the typical typology, helping promote a more collaborative and healthier work environment. Making happier employees with less time absent from work. With society moving away from the tradition of the personal desk, our pods provide a designated shelter for staff to physically and intentionally carry out a task that requires some 'focus' space. Improving an individual's concentration, safety and efficiency in their space.

Infinity

Designed by Boss

Imagine a space with no limits or boundaries. A thinking space. A creative space. A meeting space. Designed and engineered by Boss Design, the Infinity pod brings architectural value and a striking aesthetic to any workspace. Its panoramic glass aperture combined with a slimline framework can blend seamlessly into any space, providing a place of privacy for meetings or concentrated work.

Focus & Private Spaces

Focused working can make the difference, resulting effective collaboration.

The set of actions that follows collaboration is the output we are working towards, which is work that needs specific space to focus. The walls have come down but the need for quiet semi-private space has increased.

Post-Covid, working at benches in close proximity to others, or being reassigned to a different non-territorial workplace every day is not right for everyone. As an alternative to cubicles focus pods offer flexible physical distancing too.

boss

Collaboration Pods

Collective intelligence outperforms individual intelligence. Collaborative working can be defined as a group of people from different backgrounds, experience and specialisations joining together.

Our Infinity pods allow Collaborative spaces to support teamwork, they should ideally be located adjacent to Anchor or focus settings to assist in the speed of development of ideas and flow of knowledge.

Human Centric Lighting

Simple, innovative lighting control.

With employee welfare fast becoming a greater focus within the workplace, surrounding attributes including lighting and temperature all contribute towards health and wellbeing. Lighting devoted to enhancing vision and comfort promotes an individual's happiness, mood and health.

Human Centric Lighting is the means by which the emotional wellbeing, comfort and productivity of individuals can be improved simply through the correct control of the lighting in place.

The main benefits are that it can improve concentration, safety and efficiency in workplaces or educational environments. Created by changing the colour and intensity of white light, the natural circadian rhythm of a person can be supported by using warmer (relaxing) light with lower intensity in the morning and evening, and cooler (energising) light during a typical working day.

Select the Weather (STW) lighting, which incorporates Human Centric Lighting, is the perfect accompaniment to the pod. Available within any of the pods ranges, STW is a simple yet innovative lighting solution using the latest LED control technologies and Human Centric Lighting.

With four pre-set scenes - Calm Down, Energise, Concentrate and Stay Alert - you have the ability to set the scene. Warmer white light with slightly lower intensity helps users calm down when facing high stress. Cooler white light with higher intensity helps users become more energised. For example in the early morning when facing high stress, warmer white light may be used.

boss

Lighting & Air Flow System

Designed for you, controlled circadian lighting and a subtle airflow system create a comfortable and invigorating environment, encouraging productivity.

Air Flow

CO² build up has been shown to be a key factor in increasing tiredness and reducing concentration in the workplace. A ceiling-mounted ultra-quiet fan unit controls Airflow from the surrounding environment is channelled into the pod through a panel with a grill that maximises air distribution.

Air handling and circulation in the Infinity pod system is contained within the services cavity, where a dedicated plenum houses the intake fans, these quietly draw air from the ambient workspace and distribute it into the pod via an air inlet which is positioned on the central control panel.

Lower down on this panel is a passive air return, which allows air to be drawn out of the pod and returned to the adjacent office space. The dual speed choice enables the fans to circulate either 9x air changes per hour, or 13x air changes per hour.

Specifications

Features

- Five sizes available
- Overall Height 2325mm
- PIR motion/occupancy sensor (passive infrared).
- Geometric perimeter LED lighting, PIR operated with Circadian lighting feature (tuneable White).
- Acoustic fully upholstered Internal Wall Panels with lift off Internal access.
- External Wall Panels in Oak Veneer or plain laminate.
- 10mm toughened frameless clear glass panels featuring 2 levels of DDA compliant manifestations. Glass to Glass mitre corner detail.
- Acoustic ceiling panels upholstered in Camira Nexus Chalk.
- 1 x 10mm clear glass sliding door with soft open and close to include DDA compliant manifestations.
- 35mm Powder Coated aluminium frame - White RAL9003/Anthracite RAL7016/Black RAL9005.
- Dedicated services wall faced in Forbo Charcoal 4166.

- Touch Panel lighting control with four Pre-sets.
- Twin Power & USB charge.
- Discreet Airflow System in Media Wall.

Optional Extras

- Table upgrade
- LED Signage
- AV upgrade
- Writeable Glass Panels
- Acoustic roof mats
- Bespoke Manifestations
- Powder Coated Frame (Any RAL)
- Air conditioning
